

Getting Started with Model Trolleys

The following is a small sampling of some of the retailers and manufacturers who deal in model trolley parts, kits, books, imports, videos, and other merchandise. Some of these dealers offer catalogs or price listings for the merchandise they currently stock. It is suggested you call or write them to determine if they have what you are looking for or just to obtain more information about what is available in the hobby. Be sure to check out the East Penn web site for the complete list of trolley dealers and manufacturers. Our address on the web is:
